Complete end-to-end solutions

## **Computer Networking IT Specialists for the Medium-Sized Business**

- *Leaders in IT support*
- *Comprehensive network services*
- *Remote support & management facilities*

## **Taking care of business!**

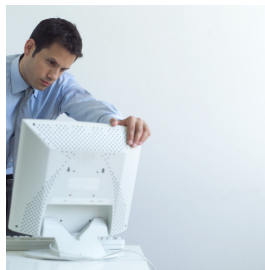

Our attention to detail when designing and implementing IT system technology is maintained at the highest possible level, from requirements gathering through to ongoing managed support.

We are intent on managing reliable solutions that ensure that you remain relaxed and focused on running your business.

VisiNet's expertise means everything is taken care of; from the design and architecture of leading-edge technology solutions, through to the co-ordination of third party vendors.

Our approach is to work from the top

down; taking the time to understand you and your business, matching the solution to your expectations and embracing the practical aspects of the technology for your competitive advantage.

***“Delivering reliable  
and trusted  
solutions with  
proven  
technology”***

## **Join our select customer portfolio**

From the outset you are welcomed and introduced to your senior technical consultant who is responsible for looking after your businesses IT needs.

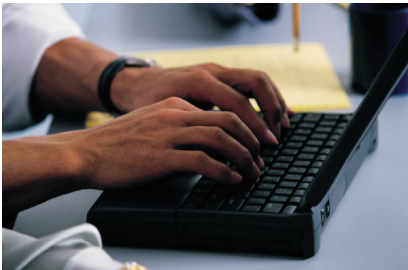

Once we have spent time carefully reviewing your operation, a plan will be formulated to bring your system in line with industry

standards with minimum disruption to your business. We are then able to focus on identifying how your company can better utilise the capacity of your existing infrastructure.

After you have realised the financial benefits of this transitional phase, you have the option to further use our services to review your core operations with the potential for even greater levels of automation and efficiency.

Comprehensive services and solutions

## Services that make a difference

At VisiNet we have a high level of skills and expertise to precisely service your company's IT systems.

Over many years, our team has built a number of smart remote management resources which enable us to provide cost effective and efficient support. These services have been developed to a corporate standard and are available to all VisiNet customers.

We take pride in delivering services that are meticulously designed to help reduce the inherent risks generally found in technology today.

Our formalised support programs can be easily tailored to fit most business requirements.

Our range of services includes;

- Design & Planning
- Implementation
